About me

Middle C# Unity Developer with over 4.5 years of commercial development experience. Proficient in C#, writing clean and maintainable code. Experienced in building project architecture from scratch and successful releasing. Deep understanding of OOP principles, SOLID, and design patterns.

Ranked 2 kyu on Codewars (solved advanced algorithmic challenges independently, relying purely on problem-solving skills rather than search engines or AI assistants)

Independent Projects

Topdeck duel 🔗

APPTOPLAY SOFTWARE DESIGN CO 🔗

Middle C# Unity Developer

- Designed the architecture from scratch and developed the client side of Cyber Arena, a midcore project released across three platforms: Telegram Mini Apps, Yandex Games (WebGL), and Google Play (Android) using a unified codebase and platform-specific builds.
- Implemented 60+ UI screens based on Figma mockups with animations powered by LitMotion.
- Built a testable architecture using VContainer, R3, and UnitTask, achieving high coverage with unit tests (NUnit, NSubstitute, FluentAssertions).
- Developed a unit animation system using Spine, including a dynamic equipment-swapping mechanic with instant visual updates on the character.
- Implemented Optimistic UI updates, ensuring a responsive interface by applying client-side changes immediately with automatic rollback on server errors.
- Integrated 10+ SDKs, covering monetization (TonWallet, IAP, Yandex Games), advertising (AdsGram, Yandex Games, Unity Ads), analytics (DevToDev, GameAnalytics, Yandex Metrica), and platform-specific services (Telegram Mini Apps, Yandex Games, Google Play Games, Absolute Games).
- Integrated AI tools (Claude Code, Codex) into the workflow to automate routine tasks and accelerate development.
- Conducted onboarding for a new developer and performed systematic code reviews to ensure alignment with the project's architectural standards.
- Actively collaborated with artists, QA testers, and game designers.

Moscow, Russia

FORCE STUDIO

Junior C# Unity Developer

- Contributed to the development of Gladiators, a midcore Android project with a SmartFox client-server architecture, taking it from prototype to Google Play release within a small team.
- Completely overhauled the game interface, transforming 100+ screens from primitive placeholders into final visuals based on Figma mockups.
- Designed and implemented a deterministic Server-Authoritative combat system without Unity Physics, featuring 9 gladiator classes, 18 types, and 72 unique abilities, including client-side calculation of movement, collisions, and physical interactions.
- Independently integrated 6+ SDKs (FMOD, Google Play Games, AdMob, IAP, Firebase, AppsFlyer, Push Notifications).
- Performed a major refactoring of legacy code, migrating the project from SignalBus to testable interfaces, which improved maintainability and decoupled implicit dependencies.
- Established the client architecture using Zenject, UniRx, UnitTask, Entitas, and Addressables.
- Managed full-cycle tasks including UI, scene composition, and animations.
- Actively collaborated with artists, QA testers, and game designers.

Additional Experience

10/2019 – 09/2021
Moscow, Russia

AIZEL

Helpdesk Specialist

- **Cross-Functional Liaison:** Acted as a key bridge between the Call Center and the Web Development team, translating customer/agent feedback into technical bug reports, clear feature requests, and actionable Jira tasks.
- **Database Administration:** Managed and queried MySQL databases to troubleshoot order discrepancies, update inventory states, and verify user account data, ensuring high data consistency for the e-commerce platform.
- **CRM Systems Management:** Oversaw internal CRM administration, configuring workflows, troubleshooting integration bottlenecks, and maintaining seamless data flow between customer support tools and the web platform.

11/2014 – 10/2019
Russia

ROSTELECOM

Technical Support

- **Technical Aptitude:** Strong understanding of home networking, TCP/IP, Wi-Fi router configurations, GPON/FTTB technologies, and basic IPTV/VoIP troubleshooting.
- **Soft Skills:** Excellent active listening, patience, and the ability to translate complex technical jargon into clear, user-friendly instructions.
